**50% NEW ZEALAND WOOL / 50% BAMBOO**

Pile height: 15-18 mm  
Weight: 4,50 kg/m<sup>2</sup>

The series of luxurious carpets by OEO Studio for massimo has a distinctly graphic character. The image - or signifier - is after all the particular legacy of man's presence on earth through millennia. Where two colours meet, their contours are hand cut. This procedure helps each motif to stand out. Whilst the process is time-consuming, the result is certainly something to treasure.

Thomas Lykke and Anne-Marie Buemann, founders of OEO Studio, have established a distinct aesthetic which bridges the difference between individual detail and overall décor. Their work can be seen in individual homes, hotels, furniture production and other applications. Their philosophy allows for each project to develop its own 'soul'. This is a factor of both the natural materials they use and the vision a customer has in mind - as is the case with massimo's 'Fragments' series. Colours and materials are often deployed in unexpected ways - each time taking inspiration from their potential to provide a convivial backdrop for human interaction

**HANDWOVEN**

**100% ITALIAN HEMP**

Pile height: N/A  
Weight: 3,00 kg/m<sup>2</sup>

The collection by Tanja Kirst emerged from the artist's master project "Re: Thinking Hemp" that aims to produce raw textile materials from sustainably cultivated hemp. Handwoven with Italian hemp yarn, each thread consists of 50 thin threads spun together and dyed in bio colour.

The colourful palette of the collection is a tribute to nature, while the unique pattern with flat weave and colour and weft effect, creates a different experience every time you enter the room. The rugs are bio-dyed, which gives them their natural colour hues that are woven in optical repetitions and interact depending on the light.

Tanja Kirst's work is characterized by reflection on thoughts and details that you don't immediately recognize. This includes subtle colour transition and gradation into shades. Tanja Kirst works with hemp as a sustainable alternative in textile design, rethinking a well-known material in a space between design and craftsmanship, she gives this eco-friendly material a whole new appeal. With interaction and observation, all the functions and details can be experienced over time. This experimental process and way of designing is developed with an intention to add more value to the textile – and to give a poetic approach and longevity to the product.

## RUG UNDERLAY

When choosing a perfect rug, it is important to not forget the underlay. Rug underlay will improve how your rug feels underfoot, but it will also help maintain your rug as well as provide extra protection against moisture. Underlay carpets are also useful as noise protectors as they minimize the sounds such as footsteps, voices or moving furniture.
